Strategic Networking in the Government

Government employees know that having a strong, powerful, and influential network can mean the difference between having an influential coalition supporting their program, and that same program withering away from a lack of support. But, unfortunately, that's not all. They also know that a strong network can mean the difference between being offered their dream job, and continuing to remain invisible when upward opportunities arise. Although they know how essential networking is, many of them don't have strong networks because they think that 1) they don't know how to network, or 2) they don't have the time to network, or 3) they can't network without losing their values. This presentation will show participants how to: Create a

networking strategy- Identify who should be within their strategic network - Build and maintain strong relationships with key individuals. *Alex D.
